Remarks

Beware of pirates!!!

We are aware of some RFID vendors linking with Visual ACE-GOLD (VAG), directly or through Excel, taking advantage of lack of awareness among jewellers about this new technology. We wish to inform that any such interface is illegal, exposing your data to corruption and misuse, making your warranty redundant, and risking total break-down of your software, accounts and inventory records. Also, such vendors can only provide stock difference report, but not integration with your inventory and accounts, as well as unable to integrate with transactions such as sales, purchase, stock transfers, consignments, etc. We advise all users of VAG to approach us directly for their RFID needs, and not go for any solutions from any such RFID vendors.

Jewellery RFID Solution from EBM

EBM has been a pioneer to provide various automation solutions specialized for jewellery business in past 20+ years – starting from software for inventory control, accounting, barcoding, picture catalogue, certificate printing, etc.

We are pleased to inform to all the jewellers that we have successfully launched RFID solutions for your business.

The RFID solution meets the need for jewellers to do daily instant stock-checking, quick sale or stock transfer of hundreds of items, without wasting much time or efforts. We provide an integrated RFID solution for the same – linked with the most popular Visual ACE-GOLD Jewellery Business Management Software, or any other software (please check with us).

You can check for more details elsewhere in this brochure, or call us for more details.
